

MORPHEUS8*v*

Morpheus8V is a gentle, non-surgical treatment that uses advanced radiofrequency technology to restore confidence and intimacy. By stimulating collagen and remodeling tissue at a precise depth, it helps rejuvenate and strengthen where women need it most. Treatments are quick—just 30 minutes—and typically performed in a series of three sessions spaced 4–8 weeks apart for optimal, long-lasting results

- Vaginal laxity
- Diminished vaginal sensation with intercourse
- Lichen sclerosis
- Painful sexual intercourse
- Vaginal dryness
- Urgency of urination
- Frequency of urination
- Urine incontinence
- Overactive bladder
- Diminished orgasm capability

How often?

3 sessions- 4-8 weeks apart

MORPHEUS8*body*

Morpheus8 combines tiny microneedles with gentle radiofrequency energy to remodel skin from within. This powerful duo stimulates collagen, tightens loose tissue, and smooths away uneven texture—almost like giving your skin a natural “shrink wrap.” The result is firmer, smoother, more refined skin with improved tone and a youthful glow—all in a single treatment.

- Tightens the skin
- Liquifies fat
- Improves cellulite
- Reduces the appearance of stretch marks and scars
- Improves “rippled” skin
- Evens out skin texture

How often?

3 sessions- 4-6 weeks apart

What areas can be treated with Morpheus BODY?

- Abdomen
- Upper Arms
- Bra roll
- Thighs
- Buttocks
- Above the knees
- Flanks

How quickly will I see results?

Though some improvement may be seen within the 1st week, most patients begin to see significant improvement after 4 weeks, with complete results in 3 months.

FORMA *v*

FormaV is a gentle, non-invasive treatment that uses soothing radiofrequency heat to stimulate natural tissue remodeling. With real-time temperature control, it delivers safe, consistent results while being tailored to your unique needs. The treatment helps restore comfort, support intimate wellness, and improve overall tissue health—all without downtime.

- Vaginal dryness and/or painful intercourse
- Thinning of vaginal wall or vaginal atrophy
- Decreased self-esteem and sexual interest
- Low blood flow and sensitivity during intercourse
- Mild urinary incontinence
- Loss of elasticity/tone in the vagina
- Wrinkled appearance to your labia and vulva
- Labial hypertrophy, leading to pain

How often?

3 sessions- 4-6 weeks apart

v TONE

VTone is a gentle, FDA-cleared treatment that helps restore pelvic floor strength and control. Using comfortable intravaginal electrical muscle stimulation (EMS), it retrains and strengthens weakened muscles to improve bladder control and reduce stress, urge, or mixed urinary incontinence. It's a safe, effective, and non-surgical way to support confidence and everyday comfort.

How often?

1-6 sessions Weekly

- Strengthens and retrains weakened pelvic floor muscles
- Reduces mild stress incontinence (leakage when coughing, sneezing, laughing, or exercising)
- Helps improve urge incontinence (the sudden, strong need to urinate)
- Addresses mixed incontinence (a combination of stress and urge symptoms)
- Supports overall bladder control and confidence in daily activities
- Provides a non-surgical option for pelvic floor rehabilitation
